

Lahoux Hemera

Night vision front mounted system

Lahoux Optics

Lahoux Hemera

Night vision front mounted system

Ideal for forest hunting

The Onyx version has a black and white image.

The Lahoux Hemera is a new development from Lahoux Optics. This short and compact design as well as the unusually large field of view for a clip-on device, are its particular strengths.

Advantages

- Very large field of view, making it also suitable as a handheld monocular
- Short and compact design
- Especially suitable for short range wild boar baiting and moving targets (on account of the large field of view)
- 3.5 cm shorter construction (in case of mounting a silencer)

Technical specifications

Tube:	Photonis™, 2+, ECHO, ECHO Plus	Accuracy/100 m:	< 1 MOA
Lenses:	Lenses optimized for ECHO Plus and Intens 4G (Government)	Parallax:	100 m
Field of view:	15,6°	Focusing range:	10 m to ∞
Lens:	50 mm	Encapsulation:	IP67
Relative aperture:	F/1.4	Battery run-time:	Approx. 30 hours
FOM:	1,000 - 1,500 (Gen 2+)	Dimensions (LxWxH):	166 x 71 x 65 mm
	1,500 - 1,800 (ECHO)	Weight:	0.580 kg
	1,800 - 2,000 (ECHO Plus)		
	ECHO and ECHO Plus included		
	Electronic gain control and ATG
